

PATHFINDER

SERIES — X1 · X2 · X3

A SUB-250G FLYING WING. THE MAVIC MINI, REDRAWN.

01 — THE PREMISE

Quadcopters spend most of their battery fighting gravity.

A flying wing trades hover for cruise — and gets dramatically more time aloft from the same 249g. Thrust vectoring alone delivers STOL and harrier-hover loiter — no flaps, fewer parts, cleaner wing.

ENERGY USE PER MISSION

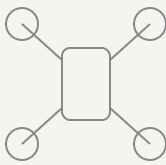

DJI MAVIC MINI

PATHFINDER

THE TARGET

DJI Mavic Mini
249g · 31 min · VTOL

02 — THREE FLIGHT REGIMES

CRUISE

Low AoA · ~22 m/s
Max range, min power

STOL

Higher AoA, vectored · ~5 m/s
Hand-launch / short land

HARRIER HOVER

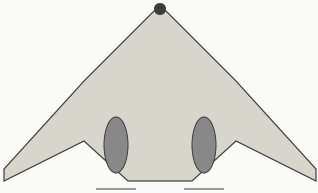

High AoA, full vector · 1–2 m/s
Cinematic dwell loiter

Twin thrust-vectored pushers replace flaps entirely — full 3-axis authority across all regimes

03 — DEVELOPMENT ARC

X1

AERO TEST BED

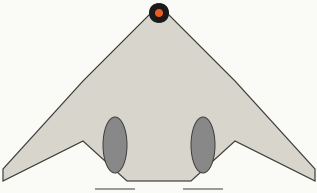

PURPOSE

Prove pure thrust-only control on a flying wing.

- Twin pusher props
Roll-axis vectored thrust
- Zero control surfaces
Mechanically simplest case
- Static FPV camera
No gimbal yet
- 3D print + ribs + CF spar

X2

FUNCTIONAL PROTOTYPE

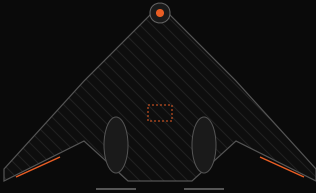

PURPOSE

Match Mavic Mini capability — beat it on endurance.

- Full active thrust control
Autonomous STOL + hover
- Gimballed FPV camera
Mavic-grade stabilization
- Custom phone app
Plus FPV goggles option
- Simple construction retained

X3

PRODUCTION

PURPOSE

Manufacturable. Safer than a quad. The product.

- Full carbon fiber body
Production layup
- Small outboard elevons
Trim + motor-out redundancy
- Deployable recovery chute
En-route motor-out save
- Sub-249g production target

04 — FAILURE TOLERANCE

A quadcopter losing one of four motors is uncontrollable. X3 has three layers: **elevon glide · vectored thrust · chute.**

DJI MAVIC MINI

= LOST

PATHFINDER X3

= RECOVERED

05 — PATHFINDER, DO THIS

Onboard vision AI. Natural-language mission commands. Mission autonomy beyond waypoints — every X3 ships AI-native.

THE HUNTER

"Pathfinder, scan for bucks only."

THE RANCHER

"Find the wild horses somewhere in this valley."

THE YOUTUBER

"Hyperlapse down the beach during sunset."

THE OFF-ROADER

"Follow my Jeep, then pan out down the trail."
